

Camera firmware update SOP

- 1. Press Fn+F6 combination keys to turn on the webcam function
- 2. Execute the firmware tool USBBridgeBurnerAP.exe.

- 3. You will see below window and the current firmware version shows on the lower right hand corner. Click the item#3 as illustrated below then the system will auto run the program.

- 4. After firmware updated, you will see the firmware version is the same as bin file version.
- 5. Close the window and restart the notebook.
